The Less Money You Can Afford to Spend on Furniture  
the More Particular You Should Be Where to Get the Most Value for It

It is easy to buy good furniture if money is plenty but a task if your means are limited. We have made it easy and pleasing for slender purses—the higher cost of living has urged us to meet the necessities of the case with furniture values that represent the most for the money spent. And this is shown convincingly at our Annual Fall Opening Exhibit and September Sale.

THIS IS HOW IT READS  
NOW

This is your share of the saving effected by the tremendous purchase of 3000 Laurel Ranges who are organizing Laurel Circles all over America.

See This Wonderful Range and you'll quickly understand why your friends and neighbors are hastening to get their names enrolled in Summerfield's Laurel Circle.

This Laurel Twin Flue Range is the only range so constructed that the entire six covers may be heated without heating the oven. It's the only range so constructed that the heat travels uniformly entirely around every square inch of the oven when you are baking.

This Marvelous Invention represents the only real improvement—the only real fuel saving feature—made in thirty years.

We Know You'll Buy a Laurel Some Day  
Let some day be today while you can participate in the benefits of our Laurel Circle.

\$1.00 a week

You can buy a Sellers Kitchen Cabinet at the rate of only one dollar per week. Without Doubt the best cabinet on the market. Let us prove it.

In this cabinet perfection has been reached; it has new features possessed by none other. For instance the tilting flour bin can be instantly removed; the pan racks are all made of wire and no lids can drop through to the floor. You do not need to remove anything from the top of the base to open the doors of the cabinet, as is the case with cabinets having large hinged doors. No club to join—no red tape—just pay us one dollar a week.

## Laurel 20th Century Heater

Hundreds Already Sold to Enthusiastic Users

Only words of praise do we hear about this grand heater. Owing to its original and patented grate it is the most widely imitated stove on the market, but on no other heater can you get the Wonderful Patented Register Grate.

Soft coal costs about one-third the price of hard coal and tests prove that it contains, within a small percentage, the same amount of heat as its brother anthracite.

Soft coal is most dusty to feed to a fire and gives off objectionable black, sooty smoke when used in an ordinary heater.

This disagreeableness is all overcome with the use of the Twentieth Century Laurel heater.

The Twentieth Century Laurel heater is a veritable soft coal base burner for it is every bit the equal of a hard coal base burner in heat, comfort and cleanliness.

Figure the saving in the use of soft coal.

The smoke from soft coal is soft coal in a vapor state; just as steam is the vapor state of water. If you can prevent soft coal from giving off this smoke you'll agree that we get more heat and at the same time use less fuel.

The patented fire pot of the Twentieth Century Laurel heater was designed for this purpose—to consume the gases which go to make smoke.

No dust or dirt can get into the room when feeding the fire, due to the patented pouch feed.

Before you buy a heater be sure and let us show you this truly wonderful—no fancy "contraptions" to get out of order but a scientific arrangement of grates and firepot that guarantee economical results.

We will place one in your home for

\$1.00 a week

## Ranges

50c a week

## ANNUAL MEETING OF ASSOCIATION

Upper Mississippi River Improvement Body to Convene at Hannibal, Mo.

The 12th annual convention of the Upper Mississippi River Improvement association will be held in Hannibal, Mo., October 15-16.

A formal call has been issued to all

municipal, commercial and civic bodies, asking each to select three delegates to the convention; also inviting representation from all newspapers.

The Chief executive officers of the five states represented in the association have been invited, namely: Governor Major of Missouri; Governor Dunne of Illinois; Governor Clarke of Iowa; Governor Eberhart of Minnesota and Governor McGovern of Wisconsin. Other distinguished speakers will address the convention.

The proceedings will show the progress being made in the great work by the federal government at

this association's instance, by which a permanent six-foot channel at low water is being made in the Mississippi river from Minneapolis to the mouth of the Missouri river.

Reports will disclose the legislation among the five states by which cities and towns on waterways may create and maintain modern adequate terminals and freight handling facilities.

The progress made during the year in terminal improvements by cities and towns along the upper Mississippi river, will be made known; also the great impetus of the river traffic with modern craft that must follow the

completion of the Panama canal.

The officers of the Upper Mississippi River Improvement association are:

President—Thomas Wilkinson, Burlington, Iowa.  
Vice Presidents—C. F. Perry, Quincy, Ill.; L. A. Hamill, Keokuk, Iowa; S. J. Roy, Hannibal, Mo.; J. G. Armstrong, Stillwater, Minn.; W. A. Anderson, La Crosse, Wis.

Paterson, N. J.—Frederick S. Boyd of New York, organizer for the Industrial Workers of the World during the strike of silk workers, was convicted of advocating sabotage. Sentence will be pronounced Oct. 3.

## PLANS TO MERGER NOT KNOWN HERE

Consolidation of Public Utilities Including Tri-City Railway, Talked Of.

For some days press dispatches and the Chicago newspapers have contained stories relative to a proposed gigantic merger of public utilities located

in northern Illinois, Iowa and Michigan, and naturally the United Light and Railways company, controlling the Tri-City railway and its nine subsidiary concerns, is included in the comprehensive scheme suggested because of its importance.

J. G. Huntoon, general manager of the local concern, today states that he knew nothing of the merger plans, other than the stories which Chicago papers had used. The Tri-City Railway company may be brought into the consolidation, but as yet officers here have received no word to that effect. According to the press dispatches the new corporation is to be known as the

Middle Western Utilities company, capitalized at a half billion dollars.

Notice to Coal Dealers.  
Sealed proposals for furnishing for the Rock Island Y. M. C. A. for the season will be received at the secretary's office until Friday, September 27, 1913. Proposal on lump, and to mine run.—(Adv.)

Not a minute should be lost under child shows symptoms of influenza. Chamberlain's Cough Remedy is as soon as the child becomes ill, or even after the coughing which pears, will prevent the spread of the disease by all druggists.—(Adv.)
